|------------------|------------------------------------------------------------------------|-------------------------------------|--------------------------|--------------------|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 00125            | Otago Rock Lobster Industry Association Inc and Pauamac 5 Incorporated | 00125.005                           | CE – Coastal environment | CE – General       | Not stated/unclear | we support the need for marine strategy development (an ‘oceans policy’) to provide a high level vision and non – statutory integration of goals and principles across marine statutes (acknowledging that there are already controls in place under the Fisheries Act etc);                                                                                                                                                                                                                                                                                                                |
| 00125            | Otago Rock Lobster Industry Association Inc and Pauamac 5 Incorporated | 00125.006                           | CE – Coastal environment | CE – General       | Not stated/unclear | We support a strategic marine planning process that is not focused on simply allocating marine space, but is based on risk assessment (including risks arising from terrestrial activities and international risks as climate change and ocean acidification) and ensuring that adverse effects of all activities are effectively managed under sector – specific legislation by appropriately resourced authorities. The strategy should foster management approaches that reflect the dynamic nature and shifting scale of marine ecosystems, and enable responsive, adaptive management; |
| 00125            | Otago Rock Lobster Industry Association Inc and Pauamac 5 Incorporated | 00125.007                           | CE – Coastal environment | CE – General       | Not stated/unclear | The RMA and related planning instruments are not needed to control fishing. To the extent that fishing has an adverse effects on the marine environment, the Fisheries Act, which is the accepted framework for managing in shore fisheries, has all the sufficient, workable controls and tools;                                                                                                                                                                                                                                                                                           |
| 00125            | Otago Rock Lobster Industry Association Inc and Pauamac 5 Incorporated | 00125.008                           | CE – Coastal environment | CE – General       | Not stated/unclear | The fishing industry supports marine protection which involves the proper management of activities that have adverse effects on fishing and the habitats and ecosystems which support the abundance of fisheries and the broader marine environment;                                                                                                                                                                                                                                                                                                                                        |
| 00125            | Otago Rock Lobster Industry Association Inc and Pauamac 5 Incorporated | 00125.009                           | CE – Coastal environment | CE – General       | Not stated/unclear | Where new activities or designations of marine space affect fishing, a process is needed to ascertain the potential impact. Where that impact is material, the new activity should be modified or controlled to avoid, remedy or mitigate that impact.                                                                                                                                                                                                                                                                                                                                      |
| 00125            | Otago Rock Lobster Industry Association Inc and Pauamac 5 Incorporated | 00125.016                           | CE – Coastal environment | CE – General       | Not stated/unclear | We therefore encourage the Council to work alongside fishing industry organisations and FNZ to understand New Zealand’s fisheries management regime and to give broad consideration to the most effective and efficient means of managing the adverse effects of fishing on marine biodiversity. This will deliver integrated biodiversity protection.                                                                                                                                                                                                                                      |
| 00125            | Otago Rock Lobster Industry Association Inc and Pauamac 5 Incorporated | 00125.020                           | CE – Coastal environment | CE – General       | Not stated/unclear | Council must commission research to justify any proposed controls in relation to the biodiversity values of each site, a risk assessment of threats to each site, a s.32 analysis of alternatives, and an analysis of the costs and benefits of the proposal (including adverse economic effects on fishing and adverse effects on fisheries sustainability arising from displacement).                                                                                                                                                                                                     |
| 00125            | Otago Rock Lobster Industry Association Inc and Pauamac 5 Incorporated | 00125.021                           | CE – Coastal environment | CE – General       | Not stated/unclear | It is not clear how the Council would monitor compliance with any controls on fishing.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| 00139 | Dunedin City Council                                                 | 00139.056 | CE – Coastal environment | CE – General | Amend | Amend policies and objectives to add cross – references/footnotes where necessary to show when a policy in the RPS is based on a policy in the NZCPS.                                                                                                                                                                                                                               |
| 00126 | Harbour Fish, Southern Fantastic and Fantastic Holdings              | 00126.025 | CE – Coastal environment | CE – General | Amend | Amend methods to clarify the role of other government agencies in identifying and implementing provisions. The fundamental application of higher legislation that addresses areas of key importance in the coastal environment (such as the Fisheries Act) need to be considered and accounted for.                                                                                 |
| 00226 | Kāi Tahu ki Otago / Aukaha                                           | 00226.013 | CE – Coastal environment | CE – General | Amend | Amend chapter so that it responds to issues raised in Part 2 of the PORPS, including SRMR – I12, SRMR – I18 and RMIA – CE, and issues raised by iwi management plans.                                                                                                                                                                                                               |
| 00226 | Kāi Tahu ki Otago / Aukaha                                           | 00226.014 | CE – Coastal environment | CE – General | Amend | Amend so that priority is given to the health and wellbeing of coastal waters and ecosystems, along with greater consideration of the environmental and cultural effects of activities on the coastal environment.                                                                                                                                                                  |
| 00226 | Kāi Tahu ki Otago / Aukaha                                           | 00226.015 | CE – Coastal environment | CE – General | Amend | Amend chapter so it contains a more integrated and holistic approach to coastal management that better recognises the inter – relationships between terrestrial, freshwater, and coastal ecosystems and environmental effects across all of these.                                                                                                                                  |
| 00226 | Kāi Tahu ki Otago / Aukaha                                           | 00226.016 | CE – Coastal environment | CE – General | Amend | Amend provisions (as set out separately) to address gaps in managing discharges, dredging, sedimentation, and activities (other than reclamation) that physically modify the coast.                                                                                                                                                                                                 |
| 00226 | Kāi Tahu ki Otago / Aukaha                                           | 00226.017 | CE – Coastal environment | CE – General | Amend | Amend to better integrate the impacts of climate change.                                                                                                                                                                                                                                                                                                                            |
| 00226 | Kāi Tahu ki Otago / Aukaha                                           | 00226.018 | CE – Coastal environment | CE – General | Amend | Amend to provide greater recognition of mana whenua roles as rakatirataka and kaitiaki of the coast.                                                                                                                                                                                                                                                                                |

|       |                                                                        |           |                          |              |       |                                                                                                                                                                                                                                                                                                                                                                                                                      |
|-------|------------------------------------------------------------------------|-----------|--------------------------|--------------|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 00226 | Kāi Tahu ki Otago / Aukaha                                             | 00226.019 | CE – Coastal environment | CE – General | Amend | Amend to better recognise and provide for customary fisheries, mahika kai and kaimoana practices, and better recognise and protect areas special to mana whenua, such as wāhi tūpuna, statutory acknowledgements and tōpuni.                                                                                                                                                                                         |
| 00125 | Otago Rock Lobster Industry Association Inc and Pauamac 5 Incorporated | 00125.003 | CE – Coastal environment | CE – General | Amend | Measures to protect biodiversity must consider evidence of genuine and actual threats to biodiversity from particular sources activities, including threats from land-based activities.                                                                                                                                                                                                                              |
| 00125 | Otago Rock Lobster Industry Association Inc and Pauamac 5 Incorporated | 00125.019 | CE – Coastal environment | CE – General | Amend | Amend PORPS to control the activities over which it has clear jurisdiction so as to avoid adverse effects on the values of the identified sites; and if fishing is threatening the biodiversity values of a site, liaise with FNZ and fisheries stakeholder groups to identify appropriate mechanisms, which may be regulatory or voluntary, to protect the values of the sites from the adverse effects of fishing. |
| 00125 | Otago Rock Lobster Industry Association Inc and Pauamac 5 Incorporated | 00125.022 | CE – Coastal environment | CE – General | Amend | Amend PORPS to help protect HPSFM that have been identified under the FA from the adverse effects of activities managed under the RMA – no particular provisions identified.                                                                                                                                                                                                                                         |
| 00230 | Royal Forest and Bird Protection Society of New Zealand Incorporated   | 00230.038 | CE – Coastal environment | CE – General | Amend | Amend the CE provisions to include areas identified as meeting Policy 11 of the NZCPS as SNA's or SMA's in addition to meeting the APP2 criteria.                                                                                                                                                                                                                                                                    |
| 00230 | Royal Forest and Bird Protection Society of New Zealand Incorporated   | 00230.039 | CE – Coastal environment | CE – General | Amend | Amend the CE provisions to direct that plans schedule the available information on values of SNA/SMA's but that this is not used as the sole source of information and that consenting processes will identify values.                                                                                                                                                                                               |
| 00230 | Royal Forest and Bird Protection Society of New Zealand Incorporated   | 00230.040 | CE – Coastal environment | CE – General | Amend | Amend the CE provisions to direct that plans schedule the character, features and values of mapped natural character, features and landscapes                                                                                                                                                                                                                                                                        |
| 00230 | Royal Forest and Bird Protection Society of New Zealand Incorporated   | 00230.041 | CE – Coastal environment | CE – General | Amend | Amend the CE provisions to include the Policy 3 precautionary approach from the NZCPS                                                                                                                                                                                                                                                                                                                                |
| 00230 | Royal Forest and Bird Protection Society of New Zealand Incorporated   | 00230.042 | CE – Coastal environment | CE – General | Amend | Amend the CE provisions to allow for natural adjustments for coastal processes, natural defences, ecosystems, habitat and species to adapt to effects of climate change.                                                                                                                                                                                                                                             |
| 00230 | Royal Forest and Bird Protection Society of New Zealand Incorporated   | 00230.043 | CE – Coastal environment | CE – General | Amend | Amend the CE provisions to include prescriptive provisions of the NZCPS.                                                                                                                                                                                                                                                                                                                                             |
| 00230 | Royal Forest and Bird Protection Society of                            | 00230.044 | CE – Coastal environment | CE – General | Amend | Amend the CE provisions to make provision of wetlands necessary to give effect to the NZCPS.                                                                                                                                                                                                                                                                                                                         |

| 00234 | Te Rūnanga o Ngāi Tahu                                               | 00234.013 | CE – Coastal environment | CE – General | Amend | <p>Amend to achieve the following (see detailed relief below):</p> <ul style="list-style-type: none"> <li>- Make the structure of the chapter clearer and easier to read and understand.</li> <li>- Better alignment with LW – WAI – Te Mana o Te Wai, LF – VM – Visions and Management, LF – FW – Fresh Water, and LF – LS – Land and Soil to improve readability across the plans, but also to provide for integrated management (see below).</li> <li>- Provide for integrated management, ki uta ki tai, including management of the relationship between freshwater and coastal water including ecosystems.</li> <li>- Prioritise protection of Ngāi Tahu cultural values and health of coastal waters over other uses.</li> <li>- Provision for customary protection areas, such as Mātaitai and Taiapure, and direction for Regional and District Plans to manage those areas in a way that supports and enables the activities within those areas is required. This includes appropriate water quality standard. Importantly, the Plan needs to direct Regional Coastal Plans, Land and Water Plans and District Plans to avoid adverse effects on customary protection areas as a result of discharges.</li> <li>- Options for mana whenua to exercise their rakatirataka and kaitiakitaka through delegated powers should be incorporated into the chapter.</li> <li>- River mouth openings are of particular importance to ensure the recruitment and escapement of diadromous fish. Provision to enable these activities is required in the chapter.</li> <li>- Climate change is and will continue to affect the coast, and coastal waters. The chapter needs to better provide for climate change, and to pull down relevant threads from the Integrated Management chapter to provide clarity for plan users.</li> </ul> <p>The Māori Commercial Aquaculture Claims Settlement Act 2004 provides full and final settlement of Māori commercial aquaculture claims since 21 September 1992. Settlement is delivered via Regional Aquaculture Agreements (RAA) which may describe areas to be provided to iwi for the purposes of commercial aquaculture. There is currently no RAA for Otago. However, to ensure that the Regional and District Plans, particularly the Regional Coastal Plan, does not undermine any future Settlement outcomes, the Regional Policy Statement must direct that Regional and District plans enable the delivery and fulfillment of any future Settlement outcomes for Otago.</p> |

| 00509 | Wise Response Society Inc                                              | 00509.056 | CE – Coastal environment | CE – General       | Amend              | We recommend that the coastal environment provisions are integrated with all other systems.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 00301 | Port of Otago Ltd.                                                     | 00301.028 | CE – Coastal environment | CE – General       |                    | Amend RPS to remove duplication of provisions applying to coastal activities and provide clarity on the policy direction. i.e., fully contain to the CE chapter, and remove application of ECO, LF, EIT, HCV, NFL and HAZ provisions from applying to the coastal environment.<br>Otherwise amend document to avoid duplication of provisions managing environmental values that are already addressed within the CE chapter of the document.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 00122 | Sanford Ltd                                                            | 00122.001 | CE – Coastal environment | General            | Support            | Generally support the approach that has been adopted by the Otago Regional Council in the RPS with respect to aquaculture activities. In particular, support the RPS including provisions for the coastal environment which accurately reflect those contained in New Zealand Coastal Policy Statement 2010.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 00125 | Otago Rock Lobster Industry Association Inc and Pauamac 5 Incorporated | 00125.014 | CE – Coastal environment | General            | Not stated/unclear | Using the Fisheries Act (FA) and the Resource Management Act (RMA) in a co – ordinated and complementary manner (so that adverse effects of activities are managed under the most appropriate statute) is central to achieving integrated management.<br><br>Due to the Court of Appeal ruling several of these are being legally contested to get clarity. We wish for Council to avoid the complications and costs of such a process by engaging with the fishing sector early to understand what integrated management should entail along the Otago coast.<br>Additional controls on fishing should be contemplated only where the Council can demonstrate that: <ul style="list-style-type: none"> <li>• a type of fishing activity has an adverse effect on biodiversity values at a specific site,</li> <li>• other activities with similar effects will be controlled to a similar extent, and</li> <li>• the adverse effect cannot be dealt with under existing other legislation (such as the Fisheries Act).</li> </ul> The RMA (and any replacement legislation) is unlikely to be the most appropriate tool to avoid, remedy or mitigate an adverse effect of fishing and should be used only when other opportunities for mitigation are not available. |
| 00125 | Otago Rock Lobster Industry Association Inc and Pauamac 5 Incorporated | 00125.018 | CE – Coastal environment | General            | Not stated/unclear | We consider that the RMA obligation to achieve integrated management requires the Council to: <ul style="list-style-type: none"> <li>• Acknowledge the role of the fisheries management regime (including but not limited to the Fisheries Act and Quota Management System (QMS)) in helping to achieve the purpose of the RMA; and</li> </ul> Support (and certainly not undermine) the role of the QMS and other components of the fisheries management regime in achieving the purpose of the FA.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 00125 | Otago Rock Lobster Industry Association Inc and Pauamac 5 Incorporated | 00125.017 | CE – Coastal environment | General            | Amend              | Amend the PORPS to achieve strategically effective integrated management with the Fisheries Act.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| 00226 | Kāi Tahu ki Otago / Aukaha                                             | 00226.152 | CE – Coastal environment | CE – M2 | Amend | <p>Amend to address the matters for clarification raised.</p> <ul style="list-style-type: none"> <li>- Clause 2 – integration concerns raised in our submission to CE – P6 include the reference to ‘highly valued natural features and landscapes’ in CE – O2. This method only refers to identification of ‘outstanding’ features, landscapes and seascapes – more restricted than CE – P6(1).</li> <li>- Clause 3 – integration matters between ECO provisions and CE – P5 are raised elsewhere in this submission, with clarification on this also needed in relation to this method.</li> <li>- Clause 4 – the inclusion of ‘significant indigenous biodiversity’ terminology in this clause furthers the lack of clarity between CE and ECO biodiversity provisions.</li> <li>- Table 2 – these appear to be Schedule 2.1 coastal protection areas from the Regional Plan Coast. It is unclear why these are chosen for prioritisation given the age of the Coastal Plan, the fact that these are all in the CMA and do not include any land – based areas, and that a comprehensive natural character and landscape study for Otago’s coastline was commissioned in 2015 by ORC and territorial authorities. The 2015 study provides a better starting point for compilation of such a list. It is also noted that Table 2 does not contain macrons and has some incorrect spelling, e.g., Pūrakaunui Inlet not Purakanui Inlet.</li> <li>- Other areas to be identified in CE – P2 include areas of deteriorated water quality and areas where mana whenua have a particular cultural interest. These are not listed in CE – M2 but are included in CE – M3 in terms of mapping in regional plans. There should be inclusion in the methods of how Kāi Tahu and any other relevant parties will be involved in the identification of these areas.</li> </ul> <p>There are no timeframes in CE – M2. Given the timeframes in CE – M1 and CE – M3, it is believed that including timeframes in CE – M2, at least in relation to matters to be mapped and included in regional plans, would provide useful guidance to involved parties.</p> |

## LF – Land and freshwater

Submissions received (from Submitters with an address for service) on this chapter have been organised into two parts.

- The first part contains those facilitated by Greenpeace, and are in general requesting the same or similar decision.
- The second part contains all other submissions.

### PART A: LF – Land and Freshwater (Individual Form Submissions facilitated by Greenpeace)

| Submitter Number | Submitter Name    | Submitter + Submission point number | Chapter                  | Specific Provision | Position | Summary of Decision Requested                                                                                                                                                                                                                                                               |
