## How to use the Summary of Decisions Requested (SoDR)

This report has been prepared pursuant to Clause 7 of Schedule 1 to the Resource Management Act 1991 (RMA) and sets out a summary of all decisions requested by submitters on the Proposed Otago Regional Policy Statement 2021 (Proposed RPS 21).

Please note this report is not a summary of the submissions in their entirety. This report does not include reasons for a submitter’s request or supporting material included with the submission. The original submission should be referred to if you are seeking to understand the issues raised by a submitter, or reasons for a request. You can find copies of all submissions received on the Proposed RPS 21 at [www.orc.govt.nz/RPS](http://www.orc.govt.nz/RPS)

Submissions are sorted by Submitter Name, and you can cross reference from the Submitter List. Searching (CTRL+F) by Submitter ID within the SoDR can also be more efficient or specific than searching by name.

### How to Read the Summary of Decisions Requested (SoDR)

The table below is an example of how the information in this SoDR has been laid out.

|                              |                            |                                                        |                                             |                                                                                                                              |          |                               |
|------------------------------|----------------------------|--------------------------------------------------------|---------------------------------------------|------------------------------------------------------------------------------------------------------------------------------|----------|-------------------------------|
| Unique submitter number      | Unique submission point ID | Plan provision or topic that the submission relates to | A summary of the relief the submitter seeks |                                                                                                                              |          |                               |
| ↓                            | ↓                          | ↓                                                      | ↓                                           |                                                                                                                              |          |                               |
| Submitter number             | Submitter Name             | Submission point number                                | Chapter                                     | Specific Provision                                                                                                           | Position | Summary of Decision Requested |
| 12345                        | Ms J Smith                 | 12345.001                                              | FW – Freshwater and Land                    | FW – WAI – O1                                                                                                                | Support  | Retain as notified            |
| ↑<br>Legal name of submitter |                            | ↑<br>Section of RPS                                    |                                             | ↑<br>Indicates the submitter’s support or opposition to a provision or section in the notified RPS, or matters related to it |          |                               |

The SoDR is set out to mirror the Proposed RPS 21’s format. Submission points have been grouped by provision, or section title where appropriate.

Submission points that apply to the Proposed RPS 21 generally, or are not specific to a provision, are grouped together. Similar general submissions that relate to a part of the Proposed RPS 21 (e.g. a domain or topic) are grouped at the start of the appropriate part. Submission points that relate to a specific provision (e.g. a policy or method), or part of a provision are located under the relevant provision and labelled accordingly as shown in the above figure.

#### How to interpret the ‘Position’ column

The Position column is used to indicate the submitter’s general position on a matter or provision in the Proposed RPS 21. To maintain a level of consistency in the way these statements are expressed the following protocols have been followed when summarising the submitter’s position:

- Requests to retain a provision as notified, in its entirety, are indicated by “Support”.
- Requests to delete a provision in its entirety, are indicated by “Oppose”.
- All other requests are indicated by “Amend”.

#### How to interpret the ‘Summary of Decisions Requested’ column.

The ‘Summary of Decision Requested’ contains a summary of the relief sought (or outcome) the submitter seeks from the Council. The focus is on identifying changes requested to the RPS. In some cases it has been necessary for the Council to clarify or provide context to the request. Where a summary includes text added by the Council this is indicated by [square brackets]. Refer to the original submission for any further detail, clarification or reasons provided by the submitter.

#### How amendments sought by submitters have been indicated in the ‘Summary of Decisions Requested’ column.

Where a submitter requests change to the wording of Proposed RPS 21 (as notified for public submission) and has included the specific wording for the change, this has been included in the summary. Submitters, and where possible ORC interpretation of submitters requests have generally followed the convention:

- Text requested to be deleted by the submitter is shown in ~~strikethrough~~
- Text requested to be inserted by the submitter is shown in underline.

In some cases submitters have chosen to indicate changes in different ways. In the interests of accurately relaying submitters wishes, these have been retained where they provide sufficient clarity. Where a specific change is not requested, the summary paraphrases the words provided by the submitter.

## List of Submitters – Part A (Address for Service Contact Details Provided)

| Unique Submitter ID | Full Submitter Name                                                                                                                                                   | Primary Address for Service                                                                            | Contact Person     |

| 00510 | Z Energy Limited, BP Oil NZ Limited, Mobil Oil NZ Limited            | 00510.001  | GEN – General Submission | Consequential amendments     | Amend  | Make any alternative or consequential relief as required to give effect to this submission [Being Z Energy Limited, BP Oil NZ Limited, Mobil Oil NZ Limited, submitter 00510 - admin], including any consequential relief required in any other sections of the ORPS that are not specifically subject of this submission but where consequential changes are required to ensure a consistent approach is taken throughout the document; and any other relief required to give effect to the issues raised in this submission. |
| 00230 | Royal Forest and Bird Protection Society of New Zealand Incorporated | 00230.003  | GEN – General Submission | Effects management hierarchy | Amend  | In relation to the use of effects management hierarchies, seek consistent amendments throughout the RPS to place the emphasis on avoiding the effects in the first place.                                                                                                                                                                                                                                                                                                                                                      |
| 00230 | Royal Forest and Bird Protection Society of New Zealand Incorporated | 00230.045  | GEN – General Submission | Effects management hierarchy | Amend  | Amend other chapters of the RPS as necessary to ensure that the effects management hierarchies are not applied within the coastal environment.                                                                                                                                                                                                                                                                                                                                                                                 |
| 00412 | Ernslaw One                                                          | 00412.010  | GEN – General Submission | Forestry                     | Oppose | Any restriction on harvesting activities over and above the NESPF would have to be justified by evidence and pass a rigorous cost-benefit analysis before being worked through with the industry and MPI / Te Uru Rākau, given the significant impact such changes would have on the wider market and economic base, communities and the work force, forestry assets and the NZ's climate change policy, to avoid the creation of stranded assets                                                                              |
| 00412 | Ernslaw One                                                          | 00412.012  | GEN – General Submission | Forestry                     | Amend  | It should be acknowledged that, with effective risk-based compliance monitoring and enforcement of NESPF in place, as per the MPI / Te Uru Rākau guidance to Councils [ <i>footnote reference provided</i> ], significant adverse environmental effects from the regulated plantation forestry activities can and will be avoided. Very few locations in Otago are so steep and erodible, that clear fell harvesting would give rise to significant adverse environmental effects.                                             |

|       |                                                                            |           |                          |          |         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| 00412 | Ernslaw One                                                                | 00412.013 | GEN – General Submission | Forestry | Amend   | Recognise the long-term provision of positive ecosystems services that plantation forestry can provide, including the sequestration of carbon. ORPS 2021 currently fails to recognise that afforestation and the spatial extension of new plantation land area, as well as the consequent displacement of pastoral agriculture, will bring multiple eco-system services and benefits.                                                                                                                                                                                       |
| 00033 | Port Blakely NZ Ltd                                                        | 00033.001 | GEN – General Submission | Forestry | Amend   | There needs to be more clarity regarding certain NES – PF 2017 forestry references made in the RPS21, such as sedimentation, afforestation, wilding conifer management and setbacks from SNA. It is not clear if the NES – PF 2017 takes precedent over the NES – F when referring to forestry activities, such as sedimentation from harvesting. Robust analysis of adopting a more stringent rule than the NES – PF under regulation 6 needs to be undertaken in order to provide evidence that the current NES – PF rules are not delivering on the NPS – FM objectives. |
| 00231 | Otago Fish & Game Council and the Central South Island Fish & Game Council | 00231.097 | GEN – General Submission | Format   | Amend   | Format the provision codes so they can be navigated to via search functions on common internet browsers and pdf viewers.                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| 00237 | Beef & Lamb NZ and Deer Industry NZ                       | 00237.074 | GEN – General Submission | General | Amend              | <p>General amendments sought:</p> <ul style="list-style-type: none"> <li>i. Overhaul pORPS to make resilience foundation of all objectives, policies, methods on for all aspects.</li> <li>ii. Overhaul pORPS to place biodiversity as the focus of policy and build other policies around that.</li> <li>iii. Give better recognition of rural land and primary sector in its value to the region for social, economic, and environmental purposes.</li> <li>iv. The RPS should include policies setting out the identification of values, and their location in the regional plan, and this should occur before environmental outcomes are decided.</li> <li>v. The pORPS should contain more directive policies which enable plans to be developed that focus on prioritising land use for the protection of productive land for food and fibre production</li> </ul> |

| 00115 | Oceana Gold (New Zealand) Ltd                                              | 00115.034 | GEN – General Submission | General | Amend | Amend the PORPS to promote the sustainable management or efficient use and development of natural and physical resources;                                                                                                                                                                                                                                                                                           |
| 00205 | Off Road Adventures Limited                                                | 00205.001 | GEN – General Submission | General | Amend | Ensure existing and new commercial recreation activities (including ancillary/supporting facilities and services) are provided for/can occur within areas classified as Outstanding Natural Landscapes, Highly Valued Natural Landscapes, Significant Natural Areas, or within areas known to be subject to natural hazard risk.                                                                                    |
| 00231 | Otago Fish & Game Council and the Central South Island Fish & Game Council | 00231.096 | GEN – General Submission | General | Amend | Make text within Parts 1 and 2 succinct to aid in readability. Suggested changes have not been made by Fish & Game, as they will likely be substantial and best proffered by the ORC.                                                                                                                                                                                                                               |

|       |                                                                            |           |                          |         |       |                                                                                                                                                                                                                                                                                                                                                                          |
|-------|----------------------------------------------------------------------------|-----------|--------------------------|---------|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 00231 | Otago Fish & Game Council and the Central South Island Fish & Game Council | 00231.002 | GEN – General Submission | General | Amend | Amend so the RPS protects water bodies and freshwater ecosystems, including the habitat of trout and salmon, from the impacts of land use and restores them where they are degraded [specific relief not stated]                                                                                                                                                         |
| 00231 | Otago Fish & Game Council and the Central South Island Fish & Game Council | 00231.003 | GEN – General Submission | General | Amend | Amend so the RPS develops a framework for considering when protecting the habitat of trout and salmon is consistent with protecting the habitat of indigenous species and assists in managing species interactions where they are of concern [specific relief not stated]                                                                                                |
| 00231 | Otago Fish & Game Council and the Central South Island Fish & Game Council | 00231.004 | GEN – General Submission | General | Amend | Amend provisions to require the RPS to take a hierarchical approach, with a priority on the natural environment [specific relief not stated]                                                                                                                                                                                                                             |
| 00231 | Otago Fish & Game Council and the Central South Island Fish & Game Council | 00231.006 | GEN – General Submission | General | Amend | Amend so the RPS recognises and provides for the way in which people connect with the environment, including recreation in and around water and harvesting food from water bodies [specific relief not stated]                                                                                                                                                           |
| 00231 | Otago Fish & Game Council and the Central South Island Fish & Game Council | 00231.008 | GEN – General Submission | General | Amend | Amend so the RPS provides protection for the wide range of Otago ecosystems and habitats by removing the words ‘indigenous’ and ‘native’ where it is not logical [specific relief not stated]                                                                                                                                                                            |
| 00231 | Otago Fish & Game Council and the Central South Island Fish & Game Council | 00231.012 | GEN – General Submission | General | Amend | significant reduction in length of Parts 1 and 2 [specific relief not stated]                                                                                                                                                                                                                                                                                            |
| 00125 | Otago Rock Lobster Industry Association Inc and Pauamac 5 Incorporated     | 00125.002 | GEN – General Submission | General | Amend | Support the concept of ‘integrated management’ as an approach to managing the adverse effects of the environment but note that the concept should be broadened than is currently set out in the draft RPS                                                                                                                                                                |
| 00032 | Parcell, Edgar                                                             | 00032.004 | GEN – General Submission | General | Amend | The uniqueness of Bannockburn needs to be recognised in the RPS21.                                                                                                                                                                                                                                                                                                       |
| 00032 | Parcell, Edgar                                                             | 00032.003 | GEN – General Submission | General | Amend | The identification criteria of resources are not complete. There are only identification criteria for identified outstanding water bodies, landscapes, and soils etc, whereas the actual features should be identified in the RPS to allow for lower order documents to take a more integrated approach. There is also no detail on native species and/or taoka species. |
| 00138 | Queenstown Lakes District Council                                          | 00138.001 | GEN – General Submission | General | Amend | Retain as notified except where specific amendments are sought by the submitter.                                                                                                                                                                                                                                                                                         |
| 00121 | Ravensdown Limited                                                         | 00121.001 | GEN – General Submission | General | Amend | Generally supports the PORPS 2021, subject to the amendments requested to address the concerns raised within its submission.                                                                                                                                                                                                                                             |
| 00121 | Ravensdown Limited                                                         | 00121.002 | GEN – General Submission | General | Amend | Amendments that enable Ravensdown’s Dunedin Works and Otago stores, its shareholders and the users of its products to continue to use and develop resources in the region in a manner that                                                                                                                                                                               |

| 00509 | Wise Response Society Inc | 00509.003 | GEN – General Submission | General  | Amend | Identify and <b>adopt a common set of ecologically sound natural resource and environmental standards</b> across the region. More localized standards would always be stronger and never weaker than these.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 00509 | Wise Response Society Inc | 00509.006 | GEN – General Submission | General  | Amend | Use biomimicry as a way of identifying what are likely to be the most efficient and sustainable way to manage and use resources                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 00509 | Wise Response Society Inc | 00509.009 | GEN – General Submission | General  | Amend | <p>Notwithstanding the baseline state requirements in the NPSFM, shift the philosophy of the Otago RPS to one where we impact and take only what we really have to, and concurrently promote the concept of “fair share”. This is because each demand we place on the environment represents a level of stress that weakens its biophysical capacity to support itself, its ecological processes and provide ecosystem services to society.</p> <p>A supporting concept is that all life has an inherent right to exist independent of utility to humans which we compromise or extinguish only as a last resort, and ultimately at our peril. The approach in the PRPS needs to change from focusing on the value and preservation of certain <u>outstanding or significant</u> life forms, to preserving and supporting the overall biophysical capacity (including many already highly modified ecosystems) because that provides the resilience to overall life supporting capacity required by the Act.</p> <p>Biophysical capacity is established by defining the extent to which regional activity is within biophysical boundaries and where these boundaries are exceeded. Where boundaries have been exceeded, activities contributing to those exceedances should be changed over time until cumulative impacts operate within boundaries.</p> <p>Likewise, wording in the draft should not imply we have some biophysical headroom, when this is not the case for many ecological categories (‘environmental limits’ s7(4)). The emphasis should be on enhancing and restoring, and not maintaining, avoiding, or minimising. Similarly, while identifying the maximum amount of harm or stress permitted makes explicit current practice, it reinforces the idea that natural systems exist to absorb negative effects.</p> |
| 00509 | Wise Response Society Inc | 00509.001 | GEN – General Submission | General  | Amend | Amend to give priority to requiring us humans to better manage ourselves, rather than better management the environment. A swing from managing effects to controlling inputs falls in this category.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 00509 | Wise Response Society Inc | 00509.011 | GEN – General Submission | General  | Amend | If we are to achieve the extent and depth of transition required, the sense of responsibility and duties of stewardship rightly claimed by Maori through Te Mana o Te Wai need to be extended to the environment generally and to all New Zealanders – particularly urban based.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 00120 | Yellow-eyed Penguin Trust | 00120.001 | GEN – General Submission | General  | Amend | Ensure that convincing support is provided for the mandatory national policy statements and standards that guide the RPS document. This should include strong outcome statements within the appropriate policies to ensure adequate protection of the natural environment, indigenous species and their habitats.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 00120 | Yellow-eyed Penguin Trust | 00120.006 | GEN – General Submission | General  | Amend | Ensure that the different sections of the RPS are consistent, well integrated and effectively linked, in particular the sections on ecosystems and indigenous biodiversity, freshwater, coastal and terrestrial environments.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 00026 | Moutere Station           | 00026.003 | GEN – General Submission | Land use | Amend | The land use provisions throughout the RPS21 would restrict the rights of landowners.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| 00032 | Parcell, Edgar                           | 00032.002 | GEN – General Submission | Land use           | Amend   | The different aspects that arise from a land use change are not clearly defined. There needs to be clarity in terms of framework to give confidence and certainty to landowners about any change that might arise. This is about integrated management.                                                                                                                                                                                   |
| 00226 | Kāi Tahu ki Otago / Aukaha               | 00226.001 | GEN – General Submission | Mana whenua        | Support | Retain the recognition of the mana and rakatirataka of Kāi Tahu, and their status as partners under Te Tiriti o Waitangi.                                                                                                                                                                                                                                                                                                                 |
| 00226 | Kāi Tahu ki Otago / Aukaha               | 00226.004 | GEN – General Submission | Mana whenua        | Support | Retain references to the relationship with Kāi Tahu in the context of partnership.                                                                                                                                                                                                                                                                                                                                                        |
| 00226 | Kāi Tahu ki Otago / Aukaha               | 00226.002 | GEN – General Submission | Mana whenua        | Amend   | Amend throughout to better define mana whenua values (including concepts such as mana, whakapapa, mauri, rakatirataka, kaitiakitaka, and mātauraka) from the perspective of mana whenua.                                                                                                                                                                                                                                                  |
| 00226 | Kāi Tahu ki Otago / Aukaha               | 00226.003 | GEN – General Submission | Mana whenua        | Amend   | Amend throughout to specify Kāi Tahu preference for deep engagement in resource management processes by referencing “resource management processes and decision – making” when referring to the role of mana whenua in resource management.                                                                                                                                                                                               |
| 00226 | Kāi Tahu ki Otago / Aukaha               | 00226.329 | GEN – General Submission | Mana whenua        | Amend   | Amend by including a map of Native Reserves and cross-referencing this from the Mana Whenua chapter                                                                                                                                                                                                                                                                                                                                       |
| 00223 | Te Ao Marama                             | 00223.001 | GEN – General Submission | Mana whenua        | Amend   | Recognise the role of the partnership between Kāi Tahu and Otago Regional Council that has resulted in co – development of text and provisions within the pORPS and preserve the intent of co – developed text and provisions.                                                                                                                                                                                                            |
| 00223 | Te Ao Marama                             | 00223.002 | GEN – General Submission | Mana whenua        | Amend   | Ensure that issues of significance identified by Kāi Tahu are addressed in the pORPS, just as the pORPS directs regional and district plans to manage these issues.                                                                                                                                                                                                                                                                       |
| 00223 | Te Ao Marama                             | 00223.003 | GEN – General Submission | Mana whenua        | Amend   | Ensure that provisions provide clear guidance about how to achieve objectives, including those relevant to Kāi Tahu in the Mana Whenua chapter and Integrated Management chapter, in situations where mapping is intended but has not yet occurred and when targets or limits are required but have not yet been set.                                                                                                                     |
| 00509 | Wise Response Society Inc                | 00509.045 | GEN – General Submission | Methods            | Amend   | Ensuring Methods give effect to the proposed firming of policy provisions.                                                                                                                                                                                                                                                                                                                                                                |
| 00016 | Alluvium Ltd and Stoney Creek Mining Ltd | 00016.001 | GEN – General Submission | Mineral extraction | Amend   | Amend RPS21 to provide for the mineral exploration, extraction, and processing activities to locate where the resource exists. This could be achieved through carrying forward the RPS19 mineral extraction policies to the RPS21.                                                                                                                                                                                                        |
| 00322 | Fulton Hogan Limited                     | 00322.047 | GEN – General Submission | Mineral extraction | Amend   | Amend as follows:<br>Amendment is sought to recognise the importance of aggregate to many aspects of life in Otago. Aggregate literally forms the foundation of the infrastructure and buildings that the region rely on (details are outlined in the general submission of the submitter p2).                                                                                                                                            |
| 00322 | Fulton Hogan Limited                     | 00322.048 | GEN – General Submission | Mineral extraction | Amend   | Amend as follows:<br>Ensure aggregates industry plan provisions that are hostile to the establishment of secure aggregate supplies do not result in reverse sensitivity and the potential for encroachment by incompatible land uses. That is allows other incompatible land uses to encroach on existing quarrying or aggregate extraction activities, or to establish on or adjacent to land that contains valuable aggregate resource. |

|       |                                  |           |                          |                    |                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| 00010 | Joostens, Phillip                | 00010.001 | GEN – General Submission | Mineral extraction | Amend              | Amend RPS21 to provide for the recognition and regional value of the extraction industry.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 00021 | Matakanui Gold Limited           | 00021.001 | GEN – General Submission | Mineral extraction | Amend              | Amend the RPS21 to recognise the functional needs of mining and that the activity needs to occur where the resource exists, acknowledge the socioeconomic benefits of mining, and manage the effects of mining.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 00021 | Matakanui Gold Limited           | 00021.003 | GEN – General Submission | Mineral extraction | Amend              | Amend the RPS21 to provide dedicated policies for mining because the extractive nature of mining is different to other primary production activities.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 00115 | Oceana Gold (New Zealand) Ltd    | 00115.007 | GEN – General Submission | Mineral extraction | Amend              | <p>Include greater recognition and support of the mining industry in Otago throughout the PORPS. Include provisions recognise that the need to provide for future mining in Otago and at Macraes in particular is a significant resource management issue for the region and which:</p> <ul style="list-style-type: none"> <li>- Recognise the significant economic and social benefits from mineral extraction.</li> <li>- Protect an ability to access these significant natural resources.</li> <li>- Recognise the finite nature of minerals.</li> <li>- Protect existing mineral assets from reverse sensitivity activities.</li> </ul> <p>Enable a regime whereby further development of the region's minerals can occur while the effects on the natural environment are appropriately managed.</p> |
| 00115 | Oceana Gold (New Zealand) Ltd    | 00115.036 | GEN – General Submission | Mineral extraction | Amend              | Delete from the PORPS the unnecessarily restrictive “avoidance” approach in respect of mineral extraction – no particular details provided                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 00015 | Aggregate and Quarry Association | 00015.001 | GEN – General Submission | Mineral extraction | Amend              | Amend the RPS21 to recognise that quarrying is both a functionally and operationally constrained activity and that quarry resources need to be protected.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| 00007 | Vergeer, Marius   | 00007.004 | GEN – General Submission | New provision | Amend | <p>Amend RPS21 to include the following Policy:</p> <p><b>Policy X.X.3</b><br/> Manage adverse effects from the exploration, extraction and processing of minerals, by:</p> <p>a) <u>Giving preference to avoiding their location in the following:</u></p> <ul style="list-style-type: none"> <li><u>i. Areas of significant indigenous vegetation and significant habitats of indigenous fauna in the coastal environment;</u></li> <li><u>iii. Outstanding natural features and natural landscapes, including seascapes, in the coastal environment;</u></li> <li><u>iv. Areas of significant indigenous vegetation and significant habitats of indigenous fauna beyond the coastal environment;</u></li> </ul> <p><u>utstanding natural character in areas beyond the coastal environment;</u><br/> <u>Outstanding natural features and landscapes beyond the coastal environment;</u><br/> <u>Outstanding water bodies or wetlands;</u></p> <p><u>viii. Places or areas containing historic heritage of regional or national significance where the effects on that historic heritage cannot be avoided;</u></p> <p>b) <u>Where it is not practicable to avoid locating in the areas listed in a) above due to the functional needs of that activity, the activity shall:</u></p> <p><u>oid, remedy or mitigate, as necessary, adverse effects on values in order to maintain outstanding or significant nature,</u></p> <ul style="list-style-type: none"> <li><u>ii. Consider first biological diversity offsetting, and then biological diversity compensation for residual adverse effects,</u></li> <li><u>iii. Consider environmental compensation if adverse effects on indigenous biological diversity, cannot practically be avoided, remedied or mitigated;</u></li> <li><u>iv. Avoiding, remedying, or mitigating adverse effects on other values including highly valued natural features, landscapes and seascapes in order to maintain their high values;</u></li> <li><u>v. Reducing unavoidable adverse effects by staging development for longer term activities and progressively rehabilitating the site, where possible.</u></li> </ul> |
| 00411 | Wayfare Group Ltd | 00411.002 | GEN – General Submission | New provision | Amend | <p>Amend whole RPS by inserting New – Provisions which explicitly recognise, protect and promote the benefits of and provide for people’s well-being, including the use of and access to the natural environment for transport, the visitor industry inclusive of commercial recreation, and ancillary commercial and industry services. This relief should flow through each level or place in the plan architecture.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| 00239 | Federated Farmers of New Zealand | 00239.002 | INTR – Description of the Region | Description of the Region | Amend   | Amend as follows (or similar):<br><u>“Otago’s economy centres around agriculture, tourism, mineral mining, and education. Agriculture is the basis of Otago’s economy, and the primary production sector continues to be a major source of revenue, employment and vibrancy for the districts and wider region. Otago’s 3300 farms are a key contributor towards Otago’s GDP. The University of Otago enrolls approximately 20,000 students each year from around New Zealand and internationally, contributing to annual population spikes in Dunedin and significantly boosting the local economy. Tourism has also had a significant impact on the regional economy, contributing about a quarter of the region’s total gross domestic product. This is the highest of any region in New Zealand, and primarily concentrated in the Queenstown Lakes District.”</u>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| 00206 | Trojan Holdings Limited (Trojan) | 00206.007 | INTR – Description of the Region | Waterbodies                      | Amend | <p>Amend as follows:</p> <p>Otago’s landscapes are diverse. Moving inland from Otago’s diverse and varied coastline, the landscapes change dramatically. Rolling plains separated by mountain ranges, steep hillsides of tussock, and deep gorges make up a lot of South and Central Otago. This <i>land</i> is dissected by flowing bodies of water, towering mountainscapes, and fascinating geological formations. Modified landscapes encompassing farmland and remnants of the region’s early gold mining activity are ever – present, creating a rich sense of heritage and regional identity. <u>There is a tremendous amount of unmodified land in our National Parks and Conservation Parks.</u></p> |

| 00239 | Federated Farmers of New Zealand                     | 00239.005 | HPSW – Cross boundary matters | Cooperation and partnerships with stakeholders                                | Amend   | <ul style="list-style-type: none"> <li>- Amend the introductory sentence as follows:<br/>“Stakeholders, from industry representatives to <u>landowners, catchment groups and</u> community – based volunteer groups, provide valuable strategic input to planning and decision – making. Inter – agency groups, such as Te Roopu Taiao, can assist with managing cross – boundary issues and issues affecting people across Otago strategically and collaboratively. ORC will seek to establish and build upon working relationships with other resource management stakeholders. This will help ensure that the processes it undertakes are efficient and, wherever possible, reduce duplication of effort. As new issues emerge in the region and work on existing issues continues, they are best managed through collaboration, which will improve effectiveness and deliver better outcomes. This is particularly important for enhancing and managing <u>processes that relate to important region – wide matters such as</u> regionally significant infrastructure and significant natural areas. “</li> <li>- Insert a new non – regulatory method committing to the establishment of a Stakeholder Advisory Group (or similar)</li> </ul> |

While district and regional plans need to address the potential adverse effects of quarrying activities, it is important that district and regional plans also recognise the importance of aggregates and the constraints that can be placed on quarrying activities and river based aggregate extraction. These constraints include:</u><br>a) <u>A lack of appropriate emphasis being placed on the importance of aggregate to wellbeing,</u><br>b) <u>Land use planning provisions that either fail to appropriately facilitate aggregate extraction opportunities or are unreasonably restrictive to aggregate extraction activities, and</u><br><u>Establishment of incompatible land use activities on or adjacent to resources leading to reverse sensitivity effects or resource sterilisation.”</u> |

| 00120 | Yellow – eyed Penguin Trust      | 00120.014 | SRMR – Significant resource management issues for the region | General         | Amend | Ensure that the context and definitions of the impacts are clear, well defined and effectively cover all of the potential issues.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 00315 | Aurora Energy Limited            | 00315.015 | SRMR – Significant resource management issues for the region | New – Provision | Amend | <p>Amend as follows:</p> <p>Add a new significant resource management issue addressing the extent to which the aspirations, challenges and resource management issues are supported by a well – functioning electricity distribution network, suggested drafting as follows:</p> <p><u>SRMR – IX</u><br/> <u>Resilient electricity supply is critical to the health, wellbeing and prosperity of Otago, particularly in adapting to climate change.</u></p> <p><u>Statement</u><br/> <u>Electricity supply is essential to our way of life. It supports community wellbeing, health, safety and economic prosperity. It also has a critical role to play in adapting to climate change by supporting communities to become less reliant on fossil fuels for heating and transport. As such there will be a need for electricity network providers to undertake significant development and upgrades to support the communities needs in the future.</u></p> <p><u>Context</u><br/> <u>Otago’s electricity supply comprises electricity generation (primarily from hydro – electricity generation); transmission through the National Grid; distribution from grid – exit points to zone substations, electricity sub – transmission infrastructure and finally through the distribution network to consumers.</u></p> |

|  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|--|--|--|--|--|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  |  |  |  |  | <p><u>The electricity distribution network connects Otago to electricity supply. As such, faults in the network can have a direct impact on the health and safety and wellbeing of people and communities. The importance of electricity distribution to the community is reinforced by its identification as a lifeline utility. Electricity distribution providers have obligations to plan and prepare for significant natural hazard events to ensure that supply is able to be maintained and/or reinstated as soon as practicable.</u></p> <p><u>Climate change will have adverse effects on these network providers by increasing the risks to the infrastructure due to increasing storm intensity, increasing temperatures etc. This will occur in conjunction with increasing demands on the network due to population growth and greater reliance on electricity. Providers will need to adapt to other changes including more small – scale community electricity generation (such as in home solar). and should be avoided by providing a framework for the operation, maintenance, upgrade and development of that infrastructure.</u></p> <p><u>Impact Snapshot</u><br/><u>Environmental</u></p> <p><u>The distribution network has adverse effects on the environment which need to be appropriately managed. However, the management of the distribution network is limited by its functional and operational needs which often dictate where it can be located in the environment.</u></p> <p><u>The development, operation, maintenance and upgrade of the distribution network can be constrained or adversely affected by the establishment of incompatible activities around the network which can give rise to reverse sensitivity effects.</u></p> <p><u>Economic</u></p> <p><u>The distribution network is critical to the economic wellbeing of people and communities. Faults in the distribution network arising from natural hazards; adverse effects from climate change and incompatible activities increase the risk of network faults.</u></p> <p><u>Failing to proactive manage incompatible activities in proximity to the distribution network may require those activities to be dis – established and cause unintended economic loss.</u></p> <p><u>A lack of integrated management and long – term strategic planning for land – use activities can delay urban growth and land use changes reliant on an electricity supply.</u></p> <p><u>Social</u></p> <p><u>Incompatible activities can have adverse effects on the distribution network and may give rise to reverse sensitivity effects. This is particularly the case where urban expansion and intensification seeks to locate near the distribution network to a degree that can create risks to the health and safety and wellbeing of people. To avoid those risks, it is appropriate to manage incompatible activities near the distribution network, including primarily electricity sub – transmission infrastructure and significant electricity distribution infrastructure.</u></p> |

|--|--|--|--|--|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  |  |  |  |  | <p><u>The production of fruit and vegetables in Otago operates as part of a national system that produces healthy food to support the essential health needs of people and provides jobs and export earnings which support the social, economic, and cultural wellbeing of our population. Those systems are under increased pressure from population growth to produce and supply food and to maintain food security. Competing demands are reducing the availability of land for primary production (particularly highly productive land), including reverse sensitivity impacts on primary production, and freshwater resources needed to produce and process food.</u></p> <p><u>Context</u><br/> <u>Otago has nationally recognised and regionally significant food production systems critical for the essential human health of current and future generations.</u><br/> <u>Currently the highest concentrations of growers are in the Central Otago and Waitaki Districts. However, there are growers located outside these areas.</u><br/> <u>The combination of soil and climate (including high diurnal range) means that Central Otago is especially suited to growing high quality crops. Central Otago is one of the main commercial growing areas in New Zealand for stonefruit. Whereas, in the Waitaki District area, a wide variety of fruit and vegetable crops are grown.</u><br/> <u>The production of fruit and vegetables (both outdoor growing and covered crops) in New Zealand operates as part of a national system, The regions supply markets at different times of the year; a sustainable, year – round supply of produce for New Zealand is only possible if the different growing regions work in conjunction to ensure that seasonality and other variables, such as diseases and weather, do not interrupt that supply.</u><br/> <u>Food security is a nationally important issue which needs to be addressed at a strategic level. While New Zealand is a net food exporter, many of the vegetables and some of the fruit that we grow are only for domestic food supply.</u><br/> <u>Diversification to horticulture presents an opportunity to reduce emissions while increasing food production. The transition to developing indoor growing and outdoor food systems that have lesser emissions, will require an integrated approach, that include behaviour change, investment in research, infrastructure, and technology as well as regulatory signals. However, they require significant investment and as such regulatory certainty, particularly with respect to matters such as water access.</u></p> <p><u>Impact snapshot</u></p> <p><u>Environmental</u><br/> <u>People are part of the natural environment, and the social, economic, and cultural wellbeing of all people must be provided for within natural environmental limits.</u><br/> <u>For future generations, it is critical that Highly Productive Land (HPL) is protected from the continual trend of cumulative loss and loss of productive capacity due to reverse sensitivity and competition for natural resources. Any protection of HPL from inappropriate subdivision, must also recognise its value for current and future generations for food production and enable its use for food production.</u><br/> <u>There needs to be flexibility to develop highly productive land in some places. What is important, is that urban development and productive land are considered together to provide a planned approach so new urban areas are designed in a manner that maintains the overall productive capacity of highly productive land.</u><br/> <u>In the context of greenhouse gas emissions reduction targets, the Paris Agreement highlights the importance of food production and food security, recognising the “fundamental priority of safeguarding food security ...” and noting the need to adapt and foster resilience and lower emissions, in a manner that does not threaten food production.</u></p> |

|  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|--|--|--|--|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  |  |  |  |  | <p><u>‘Ināia tonu nei: a low emissions future for Aotearoa’ includes the assumption (in the Demonstration Path) that 2,000 ha of land will be converted to horticulture per year from 2025 and notes that the Commission expect this could increase if “barriers – such as water availability, labour, supply chains and path to market – are addressed”.</u></p> <p><u>Opening up more opportunities for conversion to lower emissions production systems and land uses, including horticulture’ is listed as a critical outcome.</u></p> <p><u>The advice also notes that further land use change from livestock agriculture into horticulture and forestry (from 2021, additional 3,500 ha per year converted from dairy) would be required to meet the more ambitious end of the 2050 methane target if new technology does not come through.</u></p> <p><u>It is important to not create barriers to climate change adaptation and/or mitigation and enable long-term climate change adaptation and/or mitigation, though projects such as water storage and provisions which enable growing areas to move between regions. Climate change will also compound the impacts of existing pests and provide opportunities for new pests to establish themselves due to changed conditions potentially threatening food production systems and food supply.</u></p> <p><u>The regional value of food production is expressed through the vision of four the five Freshwater Management Units:</u></p> <ul style="list-style-type: none"> <li>• <u>Clutha Mata – au FMU</u></li> <li>• <u>North Otago FMU</u></li> <li>• <u>Taieri FMU</u></li> <li>• <u>Catlins FMU</u></li> </ul> <p><u>Water is necessary for food production. This is linked to population growth food demand and an essential human health.</u></p> <p><u>Economic</u></p> <p><u>For most vegetable crops, the domestic market is the primary market, but many growers produce export crops within their rotations for practical (soil health) and economic reasons. For example, onions which are predominately grown for export are grown with other vegetables crops in rotation. Onions grown in rotation with non – alliaceae crops promote soil health. Export income provides greater economic resilience.</u></p> <p><u>We need to ensure economic and environmental sustainability of primary production are taken into account when protecting HPL. Otherwise, we risk stranded assets being sold off as poorly performing lifestyle blocks.</u></p> <p><u>Social</u></p> <p><u>It is not just the economic benefits associated with primary production that are important. The rural economy supports rural communities and rural production defines much of the rural landscape. Food production values provide a platform for long term sustainability of communities, through the provision of food security.</u></p> <p><u>New Zealand also has an important role in exporting fresh vegetables to the Pacific Islands. For example, in 2016 76% of total exported potatoes went to Fiji, 87% of exported Kumara and 82% of exported cauliflower, 75% of exported cabbage went to the Pacific Islands. NZ has an important role in the food security of Pacific Islands. New Zealand and our Pacific Island neighbours are too remote to import many fresh vegetables from elsewhere in the world. Most vegetables that New Zealand imports are processed.</u></p> <p><u>While some fruit crops grown in New Zealand have a predominately export focus. Many fruit crops are grown mainly for the domestic supply.</u></p> <p><u>Ministry of Health data indicates that only 33.5% of adults and 44.1% of children are meeting fruit and vegetable intake guidelines.</u></p> <p><u>Despite, on the whole, New Zealand producing more food than we can consume (noting this is not true of all crops), many New Zealanders live in food insecurity. A 2019 Ministry of Health study analysed household food insecurity among children in New Zealand, it estimated that 174,000 (19%) of all children in New Zealand live in food – insecure households.</u></p> |

| 00235 | OWRUG                                                                      | 00235.058 | SRMR – Significant resource management issues for the region | New – Provision | Amend | <p><u>The Food and Fibre Sector is facing a significant period of change due to climate change and the need to improve environmental outcomes.</u></p> <p><u>Statement:</u></p> <p><u>The Food and Fibre sector is essential to the New Zealand and Otago economy. New Zealand is renowned for producing high quality products capable of achieving a premium price and providing food and materials for domestic consumption. This generates significant benefits for our economy and communities. However, the sector faces some significant challenges in the short, medium and long-term driven by climate change, requirements to improve environmental outcomes and global consumer trends. Otago is uniquely exposed to these challenges because of the profile of its economy. As such, particular attention needs to be paid to how change is managed.</u></p> <p><u>Context</u></p> <p><u>The food and fibre sector accounts for a significant proportion of the Otago economy. For example, in Central Otago District 14.7% of GDP, compared to the national average of 6.2%. In the Clutha District, Agriculture, Forestry and Fishing make up 32.1% of GDP, and in the Waitaki District Agriculture, Forestry and Fishing make up 32.5% of GDP. This presents risks and opportunities for the region. It means that if change is managed poorly the region will feel the impacts of this disproportionately, but the reverse is also true. Regardless, careful management of change within the sector is important so that communities are not unnecessarily impacted in a negative way. This includes the potential downstream impacts of a successful transition that have the potential to create other challenges such as pressure for urban growth and associated infrastructure.</u></p> <p><u>Impact snapshot</u></p> <p><u>Environmental</u></p> <p><u>The Food and Fibre sector cannot operate on a business as usual basis. Even in locations where water availability and water quality issues are not of concern adaptations will be necessary so that the sector is contributing to New Zealand’s carbon zero 2050 commitments. However, demand for the products produced by the Food and Fibre Sector are likely to continue</u></p> |

|-------|----------------------------------|-----------|--------------------------------------------------------------|-----------------|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|       |                                  |           |                                                              |                 |       | <p><u>to increase and the ability of the sector to meet this demand will be critical to the wellbeing of the community, particularly with respect to the provision of nutrient dense food. It will be necessary for the sector to innovate to ensure it can meet the demands of the community while working within environmental limits. There needs to be a considered and integrated approach to land – use change so that it does not give rise to unintended consequences. For example, widespread establishment of carbon forestry may adversely affect water availability, and irreversibly remove land from food production.</u></p> <p><u>Economic</u><br/> <u>As highlighted above the Food and Fibre sector has a critical role in the national and regional economy. Ultimately a well – managed transition to more efficient production methods is likely to result in higher wages through demand for more highly skilled staff etc. In the interim though change has the potential to come at significant cost to the sector. Individual producers will have varying capacity to implement changes due to their current capital structure etc. Regulatory changes that significantly compromise productivity are likely to impact on land value which will affect the equity position of some businesses and hamper their ability to implement further changes. These issues reinforce the need for a well – managed transition that allows a degree of flexibility, particularly in the medium term.</u></p> <p><u>Social</u><br/> <u>It is not just the economic benefits associated with primary production that are important. A thriving Food and Fibre Sector supports thriving rural communities ensuring these communities continue to have viable populations that support wider community activities including schools, recreational clubs, businesses etc.</u><br/> <u>In recent years the rural community has faced significant pressure due to widespread concern about the effects of rural activities on the natural environment. These issues combined with the significant regulatory uncertainty arising as a result is having an adverse effect on the health and wellbeing of people within the rural sector. At its worst these pressures can result in suicide with suicide rates in rural communities significantly higher than in urban areas. This is another reason for ensuring that the transition required within sector is carefully managed with consideration given to the capacity of the community to sustain change.</u></p> |

| 00235 | OWRUG                                         | 00235.021 | SRMR – Significant resource management issues for the region | Introduction | Amend | <p>Amend as follows:</p> <p>Otago’s people and communities rely on the natural resources that Otago’s environment provides to enable their social, economic, and cultural well-being. Natural resources include freshwater (i.e. surface and groundwater, wetlands, estuaries), land <u>and soil</u>, terrestrial and freshwater ecosystems, coastal and marine ecosystems, and air, landscapes, vegetation and natural landforms.</p> <p>From an economic perspective natural resources support, and are impacted by, <u>food and fibre production</u>, urban development, industrial development, infrastructure, energy generation, transport, marine industries (fishing and aquaculture), tourism and mineral extraction.</p> <p>From a social and cultural perspective natural resources support and are impacted by <u>food and fibre sector production</u>, recreation, housing, and cultural activities (Refer Figure 2). <u>Food and fibre sector production, in particular secure food supply and security are essential to human health needs which are to be provided for through sustainable resource management.</u></p> <p>This RPS identifies the eleven most significant issues impacting the Otago region. Issues firstly considered include natural hazards, climate change, <u>food and fibre sector production</u>, pest species, water quantity and quality, and biodiversity loss, collectively the “natural asset – based issues”.</p> |

The duration of snow cover is also likely to decrease, particularly at lower elevations. This will also lead to reduced summer waterflows                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 00311 | Trustpower Limited                        | 00311.005 | SRMR – Significant resource management issues for the region | SRMR – I2 | Amend   | Amend as follows<br>Add the following paragraph under the heading of ‘Regional Industry’.<br>“A number of hydroelectric power schemes are located within the Otago Region. The current Government has set a target for increasing renewable electricity to 100% by 2030. Alongside that sits New Zealand’s commitment to the Paris Climate Change Agreement – to reduce greenhouse gas emissions to 30% below the 2005 levels, and a domestic ‘net zero’ commitment of all greenhouse gas emissions (except methane) by 2050. For these commitments to be achieved, rapid electrification of the economy will be required, and this will require a significant increase in the installed capacity of emissions free renewable electricity generation.” |

| 00101 | Toitū Te Whenua, Land Information New Zealand | 00101.010 | SRMR – Significant resource management issues for the region | SRMR – I3 | Amend | Acknowledge how historically poor practice and mistakes have heightened the prevalence of pest species in Otago. Acknowledge how human – mediated land use change can drive pest plant trait variation and therefore their prevalence and perseverance in modified and natural environments. Note that land use change and agricultural intensification have contributed to the prevalence of invasive pest species across the region; land use change associated with urbanisation and agricultural practices is a leading cause of environmental degradation; and non – native invasive species can and have transformed ecosystems at the landscape level by altering disturbance regimes, nutrient cycling as well as above and below ground ecosystem properties. |
| 00101 | Toitū Te Whenua, Land Information New Zealand | 00101.011 | SRMR – Significant resource management                       | SRMR – I3 | Amend | In some cases pest species can be native and that the economic and social values may also be adversely affected by undesirable native species such as Coriaria arborea or Wiseana cervinata. Furthermore, this section lacks commentary on how pest species may affect the abiotic environment (the non – living part of the ecosystem).                                                                                                                                                                                                                                                                                                                                                                                                                               |

| 00235 | OWRUG                             | 00235.041 | SRMR – Significant resource management issues for the region | SRMR – I5 | Amend | <p>Amend the Social Impact Snapshot by adding the following:</p> <p><u>Many communities in Otago are heavily reliant on the food and fibre sector which generates significant economic activity, as well as providing product to both the domestic and export market. Reduction in water allocation will adversely impact on the productive capacity of the food and fibre sector with significant downstream economic consequences. These economic consequences will manifest as reduced social cohesion in small communities as people move away to find other sources of employment, or the availability of locally grown food diminishes. However, there are also opportunities for increased employment associated with the transition to new land use types that may be precipitated by changes to allocation regimes and/or climate change adaption. Managing this transition carefully will be necessary to manage the impacts that will arise for the social, economic and cultural wellbeing, including mental health of the community and seeking out opportunities that will improve these well-beings. In order to address these issues, providing certainty to resource users, including the food and fibre sector and a clear and integrated transition framework is necessary.</u></p>                                                                                                                                                      |
| 00235 | OWRUG                             | 00235.042 | SRMR – Significant resource management issues for the region | SRMR – I5 | Amend | <p>Amend SRMR – I5 Impact Snapshot as follows:</p> <p>...How much an ecosystem is affected by taking of freshwater is typically determined by departure from natural flow regimes, taking into account the magnitude, frequency, timing duration and rate of change and ecosystem capacity to recover. <u>However, in parts of Otago the flow regime that exists has been significantly altered due to the establishment of dams for water storage and hydro – electricity generation. In many cases these structures have been in place for many years (i.e. 80 to 100 years) and have values (including environmental, social and economic values) associated with them. These factors will in some instances affect the degree to which natural flow regimes can or should be restored. Further, exotic freshwater species, particularly salmonids are widespread with Otago’s waterbodies. They are valued by the community as a source of food and for their sports fishing values. However, they also can have adverse effects on indigenous species. In some cases flow regimes induced by abstractions have protected indigenous species from predation. Changes to flow regimes will need to be carefully managed to ensure that these interactions do not give rise to significant loss of vulnerable indigenous species. These factors will in some instances affect the degree to which natural flow regimes can or should be restored.</u></p> |
| 00138 | Queenstown Lakes District Council | 00138.005 | SRMR – Significant resource management issues for the region | SRMR – I5 | Amend | <p>Amend ‘Context’ as follows:</p> <p>“Population growth and land – use intensification in urban and rural environments can create increased demand for freshwater for human consumption, irrigation and other economic uses. <u>Some of these uses are more efficient and have greater beneficial effects on the environment and communities than others.</u> Freshwater resources in some places are reaching, or are beyond, their sustainable abstraction limits. <u>The RMA enables the allocation of water amongst</u></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| 00101 | Toitū Te Whenua, Land Information New Zealand | 00101.016 | SRMR – Significant resource management issues for the region | SRMR – I5 | Amend | Consideration should be given to how land use change is impacting the quality of the limited freshwater available in some areas.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 00206 | Trojan Holdings Limited (Trojan)              | 00206.083 | SRMR – Significant resource management issues for the region | SRMR – I5 | Amend | Snapshot – Economic<br><i>Freshwater</i> in the Otago region is a factor of production that directly contributes to human needs (urban <i>water</i> supply), agriculture (including irrigation), hydro – electric power supply, <u>tourism (for example water supply for visitor destinations and snowmaking),</u> and mineral extraction. <i>Freshwater</i> also indirectly contributes to the tourism industry through maintenance of <i>freshwater</i> assets for aesthetic and commercial recreational purposes. Lack of <i>freshwater</i> can negatively impact economic output of those industries that rely on <i>water</i> in the production process. To varying degrees these impacts can be mitigated through <i>water</i> efficiency measures and innovation. At the same time other industries, such as tourism <u>activities</u> that rely on the aesthetic characteristic of <i>rivers</i> and <i>lakes</i> , do not have such opportunities available to them and instead rely on management regimes that sustain flows and <i>water</i> levels suitable for their activities. |

Population growth and land – use intensification in urban and <u>non – urban</u> <del>rural</del> environments has impacted the quality of <i>water</i> , increasing contamination from nutrients and sediment.<br><br>... Some of the biggest <u>adverse</u> impacts on <i>water</i> quality in Otago are considered to come from agriculture and urbanisation, through diffuse <i>discharges</i> and point source <i>discharges</i> . |

| 00239 | Federated Farmers of New Zealand      | 00239.026 | SRMR – Significant resource management issues for the region | SRMR – I7 | Amend | <p>Amend ‘Statement’ as follows or similar:<br/> <del>“Biodiversity mapping indicates Otago is one of the most modified regions in New Zealand. ... lacking, along with incentives, support and advice to assist landowners to protect and/or restore biodiversity where it remains or where it has been lost. “</del></p> <p>Amend ‘Context’ as follows:<br/> <del>“... introduced species and diseases, urban growth, human activities, pollution, physical changes to habitat from climate, landscape changes, environment and harvesting of wild species. Almost 4,000 native species are currently threatened with, or at risk of, extinction. Around 1,065 native species across New Zealand are currently threatened with extinction. A further 3,589 are in a second tier of risk, with 3,009 considered ‘naturally uncommon’. The information available indicates Otago’s biodiversity faces the same challenges. “</del></p> <p>Amend the following sentence as follows:<br/> <del>“Biodiversity and ecosystem services underpin agriculture the primary sector (ecosystem services such as water, soil biodiversity, pest protection, pollination) and tourism (the “clean green” image of “pure New Zealand” is related to a public/consumer perception of Otago’s healthy environment and biodiversity). “</del></p> <p>Adopt the following definition of ‘Natural Capital’ for clarity:<br/> <del>“Natural capital refers to all aspects of the natural environment. It includes individual assets such as minerals, energy resources, land, soil, water, trees, plants and wildlife, and also includes broader ecosystems and their services – i.e., the joint functioning of, or interactions among, different environmental assets, as seen in forests, soil, aquatic environments and the atmosphere.”</del></p> |
| 00236 | Horticulture New Zealand              | 00236.028 | SRMR – Significant resource management issues for the region | SRMR – I7 | Amend | <p>The issue statement addresses issues associated with pests and predators on biodiversity but fails to sufficiently address issues associated with pests on biosecurity and risks to the regional food production system, food supply and food security.</p> <p>Add new issue statement for Food Production, Food Security and Food Supply that includes consideration of biosecurity matters.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

| 00303 | Tini a Tangaroa – Fisheries New Zealand       | 00303.001 | SRMR – Significant resource management issues for the region | SRMR – I7 | Amend | <p>Amend as follows:</p> <p>This section (P. 79) could be rephrased to say:</p> <p>“In addition to sedimentation, other human impacts on kelp forests in the Otago region may include land-based nutrient inputs, rising sea surface temperatures associated with climate change, the introduction of invasive species like Undaria pinnatifida (Suárez -Jiménez et al. 2017) and fishing. There has also been a 70% decline in the abundance of hoiho (yellow -eyed penguin) on the Otago coast since 2008<sup>37</sup> although the factors causing this are not fully understood. The effects of climate change will add significantly to risks of continuing biodiversity decline.”</p> <p>Suárez-Jiménez, R., et al. (2017). "The invasive kelp Undaria pinnatifida hosts an epifaunal assemblage similar to native seaweeds with comparable morphologies." Marine Ecology Progress Series 582: 45-55.”</p> |

|       |                                  |           | management issues for the region                             |           |       | <p>...However, <i>water</i> quality is being adversely impacted by increased population <u>and</u>, urban development <del>and tourism demand</del> which is straining existing waste management infrastructure. In addition, localised degradation of some areas is occurring due to overuse and unregulated use (e.g. freedom camping). The amenity of these areas is being compromised in some places by over – crowding.</p> <p>Recreation <i>use</i> impacts on the <i>environment</i> can be a <i>risk</i>, for example the distribution of pest species can be accelerated as has occurred for lake snow and <i>Lagarosiphon</i> weeds being spread by recreation boating movements. Natural features and landscape values <u>can</u> <del>are</del> also <u>be</u> adversely impacted by tourism <u>development</u>, <del>and</del> urban growth, and energy production.</p>                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 00206 | Trojan Holdings Limited (Trojan) | 00206.089 | SRMR – Significant resource management issues for the region | SRMR – I9 | Amend | <p>Snapshot – Economic</p> <p>The economic benefits of urban development, tourism, agriculture, energy production and <i>water</i> supply can be positive for the Otago – Lakes’ communities and visitors. It also impacts on the region’s natural assets with a growing cost to the region that puts at <i>risk</i> the <i>environment</i> highly prized by residents and visitors. There are also impacts between industry sectors.</p> <p>For example, the clean green image of New Zealand, of which the Otago Lakes area is symbolic, is at <i>risk</i> of being compromised <del>because of over – crowding</del> <u>if the quality of lakes becomes degraded or visitor numbers exceed the servicing capacity of the district in peak tourism seasons. This has the potential to adversely affect the existing regional economy and future economic development; and the tourism industry’s social licence to operate. At the same time tourism can negatively impact on how agriculture can operate, potentially limiting its contribution to the regional economy.</u></p> <p>Urban development brings economic development and improved opportunities and standards of living to the Otago lakes area but can adversely impact on both the <i>environment</i> and how agriculture can operate.</p> |
| 00206 | Trojan Holdings Limited (Trojan) | 00206.090 | SRMR – Significant resource management issues for the region | SRMR – I9 | Amend | <p>Snapshot – Social</p> <p><del>Poorly managed activities and</del> <u>Over – crowding</u> impacts <u>can</u> adversely affect recreation experiences of both tourists and residents, <u>particularly outdoor recreation, such as fishing and water sports, and urban amenity.</u> <i>Infrastructure</i> capacity limits can, for example, result in an increased number of wastewater overflows <u>into</u> the environment when demand on the network exceeds capacity. These can have significant adverse impacts on human health <u>including recreation opportunities</u> as well as recreational amenity.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| 00306 | Meridian Energy Limited         | 00306.017 | SRMR – Significant resource management issues for the region | SRMR – I11 | Amend | <p>Amend as follows (or with words of similar effect):<br/> “Impact snapshot<br/> Environmental<br/> While many ecosystems have a degree of resilience, increasing pressures on the environment, typically as a result of human activities (for example economic development), can have an adverse cumulative effect. <u>A key tipping point is the pending effects of climate change that are resulting from greenhouse gas emissions. Some of these effects. Climate change also has</u> are already being experienced in the Otago region, and further climate change <u>has the potential to seriously challenge ecosystem adaptive capacity and the location and functioning of business and communities in the region. Decarbonising our economy is a priority for mitigating the scale of climate change and the associated economic and social disruption that can result. Key to reducing greenhouse gas emissions is increasing renewable electricity generation. Much work is being undertaken to address this challenge, but it is still possible that permanent changes may occur (tipping point).</u></p> <p>The first and best response <u>to possible tipping points</u> is to ensure sustainable management of our natural resources and avoid immediate and long-term cumulative effects that degrade the environment. At the same time a resilience approach is needed that identifies thresholds and sets limits on the use of natural resources to avoid permanent and potentially catastrophic changes occurring, as would occur if a tipping point is reached.”:</p> |

This requires <i>resilient</i> frameworks that take account of the dynamic relationship between the <u>natural environment</u> , economy and people while acknowledging that the future is always uncertain, and knowledge is imperfect. Should a tipping point be reached a <i>resilient</i> Otago society will have the ability to absorb, respond to, adapt to, and recover from disruptive events.                                                                                                                                                                                            |

| 00318 | Contact Energy Limited              | 00318.006 | IM – Integrated management | IM – P1 | Amend   | Amend as follows:<br>Ensure provides for an integrated approach that that does not result not result constraints that prevent effective pathways for developing new renewables, and threaten existing ones, and thereby foreclose consideration of options for renewable electricity that are needed to meet NZ’s climate change commitments.<br>Peter.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 00139 | Dunedin City Council                | 00139.026 | IM – Integrated management | IM – P1 | Amend   | Where there are clear conflicts between RPS requirements amend so that there is clear guidance within the policy wording on how these should be managed (see general comments). For example:<br>In giving effect to this RPS, decision-makers should consider:<br><br>(1) All provisions relevant to the issue or decision,<br><br>(2) if multiple provisions are relevant, consider the provisions together and apply relatively weight to them according to the terms in which they are expressed, and<br><br>(3) notwithstanding the above, all provisions must be interpreted and applied to achieve the integrated management objectives IM – O1 to IM – O4.<br>However, with additional guidance on weighting here it is essential that the weight of policy language is carefully considered and the comments from the DCC with respect to policy wording should be considered. |
