SUBMISSION ON RESOURCE CONSENT APPLICATION BY CROMWELL CERTIFIED CONCRETE LIMITED

SUBMITTER: Robin & Lois Greer

105 Smiths Way

Member of Amisfield Estate Society which supplies the potable water to our property at 105 Smiths Way Cromwell.

This is the only supply of potable water that we have at this property so we rely heavily on it.

Our concern is around the risk to our water supply and the quality of it in the future should the consent be granted to Cromwell Certified Concrete Ltd.

What effect is the volume of ground water going to have on the aquifer as the Amisfield bore is only 200 metres from the proposed water take of Cromwell Certified Concrete?

Has any testing been done to show no effect on the aquifer levels?

We understand the gravel extraction will be within the aquifer

This must increase the risk of contamination to the aquifer.

Any back filling must add more risk to contamination.

The discharge of contaminants to land if not managed could expose the aquifer to more contamination.

What measures will be put in place to eliminate our water supply being contaminated?
