

Application to Disturb a Contaminated Site

*This form is to be used for disturbance of contaminated sites, including land disturbance, the discharge of hazardous waste to water, air or into or onto land, and the deposit of hazardous waste into or onto land.

ted	(For Office Use Only)
ous	Consent No.:
of	Job No:

PLEASE READ THIS PAGE BEFORE COMPLETING THE APPLICATION FORM

Proposals accompanying applications for land use consent to disturb a contaminated site may be assessed in accordance with the Ministry for the Environment "Contaminated Land Management Guidelines", if they are relevant to the activity for which consent is sought. There are 5 volumes in this series:

- Volume 1 Reporting on contaminated sites in New Zealand, October 2003;
- Volume 2 Hierarchy and application in New Zealand of Environmental Guideline Values, November 2003;
- Volume 3 Risk screening system, February 2004;
- Volume 4 Classification and information management protocols, June 2004; and
- Volume 5 Site investigation and analysis of soils, February 2004.

Otago Regional Council ("Council") strongly recommends that a consulting engineer, environmental scientist or appropriate technical specialist experienced in contaminated site work or remediation is engaged to assess appropriate methods for any work undertaken, to consider both environmental and human health and safety issues associated with such work, and appropriate remediation strategies for the site, to assist with this application for a land use consent.

Completing this Form and Additional Information

In order for any consent application to be processed efficiently in the minimum time and at minimum cost, it is critical that as much relevant information as possible is included with the application.

This application form, when properly completed, may provide an adequate "Assessment of Effects" where the adverse effects of a proposal are not significant. However this can only be determined on application. Where an application is significantly incomplete, Council may decide not to accept the application for processing.

Details of information required in an Assessment of Effects is included in the Fourth Schedule of the Resource Management Act 1991 printed on the back of Form 1 – Resource Consent Application. The extent of detail required should be relative to the scale and significance of the potential adverse effects the activity may have on the receiving environment.

Once an initial assessment has been made of your application, Council may request further information in accordance with Section 92 of the Resource Management Act 1991.

Site remedial action plan?

Yes

No 🗌

(please go to question 14)
il of previous investigations:
What was the date of the investigation(s)?
Who undertook the investigation(s)?
What was the purpose of the investigation(s)?
Were any resource consents obtained to allow the investigation(s) to be undertaken?
Yes 🗌 No 🗌
i. From which authority were consents obtained?
ii. Please list relevant consent numbers:
Please summarise the findings of the investigation(s)? (note: a summary only. Detaile
information is sought below)
Was a report produced as a result of the investigation(s)? Yes \Box No \Box
i. Please give the title, date and author of any report produced:
ii. Does Otago Regional Council already have a copy of these reports?
Yes 🗌 No 🗌
iii. If not, these reports may contain relevant information not given in the assessmer
mi. In not, these reports may contain relevant micrimation not given in the dSSeSSITE
of environmental effects with this application, therefore please attach a copy with

mitigate these:	the discharge ma	ly have and the	steps you propose to	take to

PART D: Description of the Proposed Activity

22 Please provide an overview of what do you propose to do at the site, outlining your reasons for the work, and how the work will be undertaken (if appropriate please show the area of land that is to be disturbed on the site plan):_____

What is the proposed commencement date of the work? ______
What is the proposed completion date of the work? ______
Who will be undertaking the work? ______
What are the proposed hours and days of work? ______

PART E: Assessment of Environmental Effects

27 What are the health and environmental risks associated with this work, and how will these be mitigated? Please include comment on the following factors (as appropriate):

- (a) Management of excavations and exposure of contaminated soils;
- (b) Stockpiling of contaminated soils;
- (c) Disposal of contaminated soils;
- (d) Stormwater control/diversion; and
- (e) Dust, odour and other airborne emissions.

If the disturbance of the contaminated site will res		-
air, in the vicinity of the discharge are there any:(a) residential developments?	Yes	No
(b) production land (e.g. crops, dairy farming)?		
(c) recreational activities (e.g. parks, sports fields)?		
(d) areas of aesthetic or scientific value?		
(e) areas or aspects of significance to iwi?		
(f) commercial activities (e.g. office blocks)?		
How will public safety be maintained during the we	ork?

	e how and where su	rface water wil	l be sample	Yes
disturbance? If yes, please describ	e how and where su ytical parameters for w	rface water wil	l be sample es will be ar	Yes

PART H: Consultation

1

41 Please provide any written approvals to the activity using Council's standard *Form 1 Resource Consent Application.*

PART I: Is Your Application Complete?

In order t	o provide a complete application have you remembered to:	
(a)	Fully complete this schedule?	
(b)	Include a location / site plan?	
(c)	Include any relevant site reports?	
(d)	Attached any other appropriate additional information?
