

11.1.18.

Submission: Regarding the flow of the
LINDIS RIVER

- I wish to add my support to the O.R.C.'s submission regarding this river, in its request to maintain the riparian rights of the river.

- The O.R.C. have suggested a flow rate: this should be the minimal flow rate to maintain the flora & fauna of the river & its environs.

- This flow rate should be maintained all year round to enable the river to remain healthy in the years to come.
