

Otago Regional Council
DIRECTIONS OF THE COMMISSIONER
Minute 2 - Errata

Further Questions for the S42A Report Author

- [1] On 1 July 2020 I issued Minute 2 with questions for the Section 42A Report author.
- [2] I now have further questions that I would appreciate being answered along with the initial questions:
1. Regarding the issue of additional resource consents being required to abstract water from the LGRS storage dams and races, would those activities be covered under the primary consent sought which is:¹
To take surface water for the purpose of irrigation, industrial use, storage, domestic use, and stock drinking water.
 2. Has legal advice been sought on the above matter?
 3. Does ORC require take consents for abstractions from other irrigation storage dams and races in the region?
 4. Is a consent required for the discharge of water from Clavert's dam to Bailey's Gully?
- [3] Can the attached questions please also be provided to the applicant and submitters for their information.
